a Touch System

The Overture

"Computers should fit into your lifestyle not dictate it"

Personal computing is as individual as taste in music. While composing a concerto may be a little adventurous, orchestrating your own PC is a reality. Experience complete freedom to choose only what you want and purchase only what you need, by creating your own personal symphony with Touch Systems. It's quick, it's simple, and it's music to your fingertips.

How do I Orchestrate a Touch System?

Simply, express yourself.

"What do I actually need my computer to do?"

Are you looking to simplify your life with online banking, create the occasional greeting card, and surf the internet? Maybe you are looking for a powerful workhorse to maintain a small business. Or are you ready to take on the world's fastest gaming software and just have fun? Your personal requirements will determine the level of Touch system you select. Next choose your system colour and size, add any peripherals such as monitor and printer and you're ready to perform.

Why Entertain a Touch System?

Although customers freely choose the configuration of their system, components used in a Touch System meet strict standards and are never compromised. Only quality parts and components such as: Asus motherboards, Intel or AMD processors, Maxtor or Western Digital hard drives, ATI or nVidia video cards are used. Drives such as, DVD-RWs are always the fastest and most state of the art. Award winning Touch Systems are 100% Canadian built in facilities and systems subject to ISO 9001:2000 government conditions and are UL certified.

The Price of Fame

The Touch name has become synonymous with quality and product integrity. This mainstay has built credibility and long-standing relationships with industry leaders. For the serious PC buyer, this leading edge technology and value, allows Touch Systems to offer a superior product at a competitive price.

The Instruments of Success

With the extensive use of quality components, all Touch Systems come with an unprecedented 3-year limited warranty on parts and labour. This is our way of ensuring you get the very best value out of your Touch System in the future. All Touch Systems are very flexible and fully expandable with industry standard components. When you purchase a Touch System, you have chosen a classic.

Allegro! How fast can I get a Touch System?

Buying a Touch has never been easier. Touch Systems are built to order daily. Popular pre-configured systems are readily available for shipping to the retailer. Without sacrificing quality, this process is actually faster than most other commercially advertised computer companies.

"Classics stand the test of time"

Originally marketed as a top-notch corporate solution, award winning Touch Systems have been a successful part of Canadian business for the past 15 years. Touch computers are successfully used in school boards, hospitals and corporations all across the country. Previously voted reseller's choice for best Canadian PC, Touch continues to serve both corporate and consumer requirements through computer retailers across Canada. In recent years, increased customer savvy for more than just "bells and whistles" has risen. The demand for better quality, more affordable products is heard across the board. With this benchmark for success already in place, Touch Systems continue to not only meet, but also exceed today's customer expectations.

Orchestrate a Touch System Today

Touch Systems set the stage for the ability to out perform. An audience of one is all it takes to unleash this potential...that audience is you. Realize your freedom to choose and experience the power of a Touch System today.
